## ***Guidance for Submittal of Surface Water Data / Information for Development of the 2016 Clean Water Act Section 305(b) Water Quality Report and Section 303(d) List of Impaired Waters***

The New Hampshire Department of Environmental Services (DES) encourages anyone who has surface water data/information to submit it to DES electronically at any time. However, for inclusion in the 2016 Surface Water Quality Assessment, data must be submitted by October 30<sup>th</sup>, 2015. The information you provide can help DES identify waters:

- that are meeting designated uses such as fishing or swimming (i.e., waters in good condition);
- that are not supporting their designated uses (i.e., impaired waters); and
- which require additional monitoring/investigation before a final assessment can be made.

Your information may be used to help prepare surface water quality assessments as required by Sections 305(b) and 303(d) of the Clean Water Act (CWA). Section 305(b) requires each state to prepare a water quality inventory of its surface waters every two years. Section 303(d) requires states to prepare a list of “water quality limited” surface waters, those which do not meet state water quality standards. Water bodies on this list require the development of comprehensive water quality studies, also known as Total Maximum Daily Load (TMDL) studies, to help guide restoration efforts. The resultant list is commonly called the “303(d) List.”

DES is interested in all types of surface water quality or quantity data/information, regardless of whether it suggests that the waterbody is in good or poor condition.

To increase the chances that your data will be considered in the assessment process, DES recommends that it be submitted electronically and in a format that may be easily loaded into the Environmental Monitoring Database (EMD). The EMD is a database developed by DES to store all types of environmental data and metadata (i.e., information on how it was collected) regardless of who collected the data (see <http://des.nh.gov/organization/divisions/water/wmb/emd/index.htm>). Once in the EMD the data can be analyzed and, with the help of automation, assessed more rapidly, which is necessary due to the large quantity of data that must be analyzed. Other benefits of including your data in the EMD include:

- The EMD is Web Enabled which means that your datasets can be automatically available to anyone through the DES website at [http://www2.des.state.nh.us/OneStop/Environmental\\_Monitoring\\_Menu.aspx](http://www2.des.state.nh.us/OneStop/Environmental_Monitoring_Menu.aspx) ;
- DES can provide information on how often your data is queried from the EMD which can help to fulfill certain grant reporting requirements;
- DES can work with your group to upload your data to EPA’s Water Quality Exchange (WQX) (STORET replacement) ; and,
- Your data will help to improve water quality planning and restoration.

### ***WHAT TO SUBMIT***

The utility of data/information depends largely on the quality and completeness of the submission. In general, scientifically sound and defensible evidence is needed to determine if a waterbody meets water quality standards. Lesser quality data is still useful as it provides a preliminary sense of water quality that can be used to planning purposes and to guide future monitoring efforts/investigations.

9/9/2015

For electronic data submittals, the base information is the same as outlined below for paper submissions except that it is not necessary to fill out the paper form. The submitter is encouraged to start the electronic data submittal process in advance of the October 30<sup>th</sup> deadline so that your program, station, and metadata is in place when the sampling results are ready to be entered.

If you have surface water data/information and intend on submitting paper data, please complete the attached "Surface Water Data/Information Submittal Form" and submit it, along with any other supporting documentation, to DES. A copy of this form is available on our website at <http://des.nh.gov/organization/divisions/water/wmb/swqa/index.htm>

For all submitted datasets it is requested that the applicable Site Specific Project Plan (SSPP), Standard Operating Procedures (SOPs), and/or Quality Assurance Project Plan (QAPP) be submitted as described below in "HOW TO SEND DATA TO DES".

If all information requested on the form is already provided in another document, please reference and submit a copy of the document. If possible, it is preferred that data be sent electronically (i.e., Direct submission to the EMD, Excel spreadsheet, MS Word documents, GIS layers, etc.).

If you are part of a Volunteer Lake Assessment Program (VLAP) or Volunteer River Assessment Program (VRAP) group, your submitted field datasheets are entered into the EMD after QA/QC by department staff. No additional submission is necessary unless you have datasets that have not been submitted to your department contact.

## ***HOW TO SEND DATA TO DES***

For electronic submittals, contact DES via e-mail before Oct. 31, 2015. DES staff will guide you through the process of how to submit your data for inclusion in the EMD. For paper submittals, please complete the attached "Surface Water Data/Information Submittal Form" and submit it, along with any supporting documentation, to DES by e-mail, fax, or mail at the addresses shown below. If you are requesting an EMD electronic submittal PIN for data please note that in your request.

# SURFACE WATER DATA INFORMATION SUBMITTAL FORM

Water Division / Watershed management Bureau /  
Surface Water Quality Assessment Program

RSA/Rule: Voluntary

<b>For DES Use:</b>	<b>AU:</b>	<b>Record #:</b>
---------------------	------------	------------------

Please fill in all blank boxes below and attach any supporting documentation or information. If included in another document, please reference and submit the document. The more complete your submittal, the more useful it will be in our surface water assessment. Thank you.

<b>Today's Date:</b>			
<b>CONTACT INFORMATION</b>			
<b>Your Name:</b>		<b>Organization:</b>	
<b>Phone Number:</b>		<b>E-Mail:</b>	
<b>P.O. Box or Street:</b>		<b>City or Town:</b>	
<b>State:</b>		<b>Zip Code:</b>	
<b>LOCATION WHERE SURFACE WATER DATA / INFORMATION WAS COLLECTED</b>			
<b>Name of Waterbody:</b>			
<b>City or Town:</b>			
<b>Description of, and a plan or sketch showing, the area of interest or concern, including sampling locations, if applicable.</b>			
<b>Is a plan or sketch attached?</b>			
<b>Directions to the site(s):</b>			
<b>SURFACE WATER DATA / INFORMATION</b>			
<b>Actual data or information including dates and time of collection, measurement results, pictures, etc.</b>			
<b>Summary of what you think the data or information indicates about water quality.</b>			
<b>Documentation of quality assurance methods used in collecting, analyzing and reporting data.</b>			
<b>HOW TO SUBMIT SURFACE WATER DATA / INFORMATION TO DES</b>
