Subject: DWGB Lab Upload Issue with Alternative Sample Locations

Hi,

The new validations we put in a couple weeks ago for Sample Location ID/ Location have been removed from lab upload. The drinking water submittal system is back to the way it was before COVID-19.

Please remember when uploading alternative bacteria sampling sites to include a clear site description and forward changes to dwmonitoring@des.nh.gov

If you are having other issue uploading spreadsheets or logging samples please contact Mitch Dezak Mitchell.Dezak@des.nh.gov

Best,

Chris
