Subject: FW: Requested health data on PFAS

Mary, Can you handle this for us? If we need to set up a drop box we can.

Subject: Requested health data on PFAS

Good afternoon, Sarah~

I attended the PFAS information meeting last evening in Litchfield and noted the agency was seeking potential health studies that may have additional studies or newer studies than were available in the ATSDR report.

I noted that last month the Australian DoD had declassified a health study they had completed. I'm not a scientist so am not qualified to determine if this has any valuable – just sharing what I provided to our internal experts. Apparently, the report is too big to email – is there a drop box or other place I can put the report so you can access? If you already have it, just let me know. I'll screen shot the first page. It studies several PFAS chemicals.

Stage 2C Environmental Investigation – Human Health Risk Assessment, Army Aviation Centre Oakey
