Subject: References List

Hi Sarah,

I briefly reviewed the reference list, and saw that there are many references available in the ITRC draft PFAS Technical-Regulatory Document regarding health effects that are not included in the draft reference list posted on the PFAS blog. Attached is a copy of the draft document – health effects are in Chapter 7.

Also, I didn't see the following on the list:

- New Dutch National Institute for Public Health and the Environment (RIVM) Report: "Mixture exposure to PFAS: A Relative Potency Factor approach" RIVM Report 2018-0070.
<https://www.rivm.nl/dsresource?objectid=6ca2deab-9e68-4457-986f-cbaa1dad2a4f&type=pdf&disposition=inline>
- Early life exposure to per- and polyfluoroalkyl substances (PFASs): A critical review K. Winkens, R. Vestergren, U. Berger, I. Cousins. Emerging Contaminants 3 (2017) 55e68. 1 June 2017 <S:\DES-COMMON\PFOAinvestigations\hwrprograminformation\Reference materials\General\Winkensetal.PFASEarlyLifeExposureReview.pdf>

Thanks,
Kate Emma
