5. Short Title: **Public Water Systems: Sampling Schedules**

6. (a) Summary of what the rule says and of any proposed amendments:

The existing rules in Env-Dw 700 reflect federal requirements that apply to public water systems (PWS). Because the rules are in place, the State has primacy to implement the federal safe drinking water program.

Env-Dw 708 establishes the parameters for sampling schedules for PWS, including but not limited to sampling points, the sampling frequency for a variety of contaminants, the process and criteria for a PWS to request reductions in sampling frequency, and the actions required of PWS when contaminants are detected. Most of the rules are scheduled to expire on May 1, 2018, so the entire Part is proposed to be readopted in order to retain primacy. **The existing rules will remain in effect until new rules are in effect pursuant to RSA 541-A:14-a, I, subject to the conditions therein.** As part of the readoption, amendments are proposed to (1) clarify the rules [ref. Env-Dw 708.01(e)(5)-(7), Env-Dw 708.11(c)(4)]; (2) realign the rules with the federal requirements [ref. Env-Dw 708.09(a)]; and (3) replace the term “owner” with “O/O” to reflect the change in terminology required by EPA [throughout].

6. (b) Brief description of the groups affected:

The rules affect owners and operators of public water systems.

6. (c) Specific section(s) of state statute or federal statute or regulation the rule is intended to implement:

10. Fiscal Impact Statement (Prepared by Legislative Budget Assistant): FIS # 18:079 , dated 4/24/2018:

1. Comparison of the costs of the proposed rule(s) to the existing rule(s):

There is no difference in cost when comparing the proposed rules to the existing rules.

2. Cite the Federal mandate. Identify the impact on state funds:

RSA 485-:1, I and the 1996 amendments to the federal Safe Drinking Water Act, as reflected in 40 CFR 141, require a state to adopt standards that are as least as stringent as the federal Safe Drinking Water Act. The rules in Env-Dw 708 are needed for the State to continue to demonstrate equivalency so the State can implement the program in lieu of the US Environmental Protection Agency (EPA). The State receives approximately \$8 million annually in federal funds to implement the Safe Drinking Water Act programs, which would be at risk if the State did not have primacy.

3. Cost and benefits of the proposed rule(s):

A. To State general or State special funds:

None.

B. To State citizens and political subdivisions:

None.

C. To independently owned businesses:

None.

11. Statement Relative to Part I, Article 28-a of the N.H. Constitution:

The proposed rules reflect federal requirements that would apply whether or not the Department adopted the rules. The proposed rules thus do not create, modify, or expand a program in such a way as to require political subdivisions to make additional expenditures, and so do not violate Part I, Article 28-a of the N.H. Constitution.
