

Effective December 23, 2016, We 101.08, We 101.11, We 101.24, We 101.27, and 101.38 read as follows:

We 101.08 “Closed loop geothermal well” means a boring drilled into the earth, which includes a closed pipe loop grouted in place for the purpose of transferring heat to or from the subsurface.

Adopt We 101.11 and renumber subsequent sections accordingly, so that We 101.11 reads as follows:

We 101.11 “Critical well location” means an actual or proposed well location delineated on state approved plans and specifications, pursuant to RSA 485-A:30-b, with a conditional approval requiring the location not be moved, usually a result of lot loading requirements.

We 101.24 “Listed” means equipment or materials included in a list published by an organization that is acceptable under the current National Electrical Code, adopted pursuant to RSA 155-A:1, IV, and concerned with evaluation of products, that maintains periodic inspection of production of listed equipment or materials, and whose listing states that either the equipment or material meets appropriate designated standards or has been tested and found suitable for a specified purpose.

We 101.27 “Open loop geothermal well” means a water well constructed for the purpose of transferring heat to or from the subsurface.

We 101.38 “Sewer” means a pipe or conduit used to convey sewage.
