Podcasts Highlight Ocean Topics, including Sea Level Rise, National Ocean Service

Gulf of Maine Times January/February issue, Gulf of Maine Council on the Marine Environment

UPCOMING TRAININGS AND WEBINARS

February 1, 2-3 pm, Coastal County Snapshots, webinar, NOAA Coastal Services Center

The Rip Tide E-Info is published bi-weekly by the Coastal Program at the New Hampshire Department of Environmental Services. It is your source for news clips and links to workshops and trainings; the latest websites and reports; grant openings; and events important to your work in New Hampshire's coastal region.

The New Hampshire Department of Environmental Services Coastal Program provides funding and staff assistance to towns and cities, and other local and regional groups who protect clean water, restore coastal habitats, and help make communities more resilient to flooding and other natural hazards. The program's efforts are focused on N.H.'s coastal watershed, an area that encompasses 820 square miles and 42 municipalities. The Coastal Program supports the region's economy by helping to preserve the environmental health of the coast and Great Bay and Hampton-Seabrook estuaries for fishing and shellfishing, and assisting with the maintenance of our ports, harbors and tidal rivers for commercial and recreational uses.

The funds are available to the Coastal Program through the National Oceanic and Atmospheric Administration (NOAA), Office of Ocean and Coastal Resource Management, pursuant to the Coastal Zone Management Act of 1972.
