Petroleum Reimbursement Fund Program

RSA 146-D, RSA 146-E, RSA 146-F, and RSA 146-G

2014
Annual
Report

Oil Fund Disbursement Board

August 25, 2014

EXECUTIVE SUMMARY

Pursuant to RSA 146-D:5, II, RSA 146-E:7, RSA 146-F:6 and RSA 146-G:9, this document presents the Annual Report of the Oil Fund Disbursement Board on the Oil Discharge and Disposal Cleanup Fund, Fuel Oil Discharge Cleanup Fund, Motor Oil Discharge Cleanup Fund and Gasoline Remediation & Elimination of Ethers Fund for the Fiscal Year (FY) ending June 30, 2014. The report includes fund program background and objectives, FY 2014 activity, current and historic financial activity, and revenue and expense projections for the next two fiscal years. The report and related program information is available at:

<http://des.nh.gov/organization/divisions/waste/orcb/fms/prfp/orcb/fms/prfp/index.htm>

Program Background

The New Hampshire Petroleum Fund Program is a financial assistance program for owners of petroleum storage facilities, owners of public and private water supplies, and owners of properties identified as a source of gasoline ether contamination - typically methyl tertiary-butyl ether (MtBE). The program includes four separate dedicated funds authorized by state statute for the cleanup of petroleum contamination. These funds are: the Oil Discharge & Disposal Cleanup Fund authorized by RSA 146-D, the Fuel Oil Discharge Cleanup Fund authorized by RSA 146-E, the Motor Oil Discharge Cleanup Fund authorized by RSA 146-F, and the Gasoline Remediation & Elimination of Ethers Fund authorized by RSA 146-G.

The RSA 146-D fund was enacted into law in July 1988, and program operations began in 1990. The other three funds were added to the program in subsequent years, the most recent being the gasoline ether fund in July 2001. The fund program serves New Hampshire citizens by providing financial resources to protect public health, remedy environmental impacts, and avoid financial hardship.

The RSA 146-D, E & F funds provide “excess insurance” coverage for owners of underground storage tank (UST) facilities, owners of above ground storage tank (AST) facilities, owners of on-premise-use heating oil facilities (primarily residential properties), and owners of land where facilities are or were located. Under federal and state regulations, UST owners are required to demonstrate financial responsibility (FR) for contamination cleanup. The RSA 146-D fund satisfies both

the federal and state FR requirement. To qualify for state fund coverage, facilities must be in compliance with all applicable state and federal rules for operation and maintenance, and thus provides an incentive to reduce the risk of releases. Out-of-use facilities must be properly closed, which is typically accomplished by removal from the property. Together, these three funds comprise a comprehensive excess insurance program that protects facility owners from financial devastation and ensures timely and cost-effective cleanup of petroleum contamination. Owners of petroleum storage facilities may request reimbursement for cleanup costs incurred due to facility releases.

In addition, under RSA 146-E, low-income homeowners may receive up to \$1,500 in funds for repair or replacement of substandard on-premise-use fuel oil storage tank systems, to prevent releases and avoid cleanup expenses.

The RSA 146-G fund was enacted in 2001 to specifically address the problem of MtBE contamination in public and private drinking water supply wells throughout the state. Although MtBE was banned as a gasoline fuel additive effective January 1, 2007, it remains a significant contaminant of concern in groundwater.

The fund program is administered by the Oil Fund Disbursement Board (Board), which is composed of twelve members representing the N.H. Legislature, the petroleum industry, state agencies and the general public. The Board is administratively attached to the Department of Environmental Services (DES), which performs program support services. The Board meets regularly to

approve activity reports, review policies and procedures, consider rule waiver requests and hear appeals.

Reimbursements from the Oil Discharge & Disposal Cleanup Fund (ODDCF), the Fuel Oil Discharge Cleanup Fund (FODCF), the Motor Oil Discharge Cleanup Fund (MODCF) and the Gasoline Remediation & Elimination of Ethers (GREE) Fund are subject to N.H. Administrative Rules Chapter Odb 400 and Board policies.

Objectives & Activity

The Board and DES work cooperatively to ensure that the purpose and goals established by statute for each fund are met, which are protection of public health and the environment through the funding of cleanup activities for petroleum contamination in soil and water, and funding of activities to prevent releases that cause petroleum contamination. DES program staff work to move cleanup projects toward regulatory closure in a timely manner. This activity includes review and approval of cleanup work scopes and budgets, activity reports, and reimbursement requests. In a typical month, DES staff will review and approve 70 work scopes/budgets, 200 cleanup activity reports and 190 reimbursement requests ranging from under \$1,000 to over \$200,000. Whenever possible, innovative and performance-based strategies are employed to improve cleanup results and decrease the time to complete regulatory closure of a project.

The Board oversees financial management of the funds including development and implementation of rules, policies and procedures for fund eligibility and reimbursement request processing. In its

efforts, the Board may employ independent auditors or consultants, and relies on the Department of Justice for legal counsel.

Community Assistance & Economic Development

Since program inception, \$251,980,232 has been disbursed from the funds to individuals, small and large business owners, political subdivisions and State agencies for cleanup cost reimbursement, with comparatively low program management and administrative costs. Petroleum storage facility owners or individuals in nearly every community have received fund program cleanup cost assistance. In addition, \$3,676,231 has been disbursed to low-income homeowners for fuel oil release prevention. See Tables 1 and 2 in the Appendix.

The funds provide a direct benefit in protecting public health, and in environmental damage prevention and restoration. Further, the program provides ancillary economic development benefits by offsetting unplanned costs that would otherwise be incurred by property owners and by encouraging property revitalization and reuse. Numerous blighted properties in the State have been successfully redeveloped, including municipally-owned properties, due to cleanup cost funding which often facilitates/leverages private development funds. Properties with low taxable value due to contamination are restored to productive use.

Program Recognition

The New Hampshire petroleum fund program continues to receive high marks from USEPA, consulting engineers, petroleum industry

representatives, and facility owners. New Hampshire has achieved nearly 100% regulatory compliance in its efforts to remove or upgrade substandard underground storage tanks to prevent releases. Therefore, the risk of financial impact to the ODDCF is greatly reduced versus when the program began and the rate of releases was much greater. Our compliance performance places us at the top tier nationally among the states.

Completing regulatory closure of existing FODCF, ODDCF, and GREE Fund cleanup projects depends on adequate revenues. In addition, the fuel oil Safetank Release Prevention Program can greatly reduce future cleanup expenses if there are sufficient FODCF revenues. Thus, the Board and DES work to ensure continuous improvement in management of the four funds, and make recommendations to the Governor and Legislature on addressing future revenue needs for this vital program.

Legislation, Rulemaking & Related Activity

In 2014 HB 1229-FN passed, extending the ODDCF and GREE Fund lapse dates to July 1, 2025, and providing an additional \$500,000 in cleanup cost coverage under the ODDCF.

The most recent revisions to the fund program rules under N.H. Administrative Rules Chapters Odb 100, 200 and 400 were adopted in September 2011, December 2013 and April 2014. The program guidance manual was updated and re-published in January 2012, and provides comprehensive information on accessing the reimbursement funds. Another

update is planned for early 2015. The manual is available at:

<http://des.nh.gov/organization/divisions/waste/orcb/fms/prfp/orcb/fms/prfp/index.htm>

Cleanup Project Activity

For a typical project, the sequence of “phased” cleanup work from discovery of a release through regulatory closure is: Emergency Services, Initial Response, Site Characterization, Site Investigation, Remedial Plan, Remedial Plan Implementation and finally, Monitoring. (Monitoring may also occur at projects where remediation is delayed or postponed due to limited availability of funds.) The nature of the product released dictates the type of work needed to complete cleanup. A gasoline release will spread further in environmental media such as soil and groundwater hence, a comprehensive site investigation is usually required prior to remedial plan development and remedial plan implementation. In contrast, contamination from a fuel oil release is frequently limited to soil. Therefore, fuel oil cleanup work typically occurs under the Initial Response phase, and these projects move more quickly to regulatory closure without a comprehensive site investigation.

The majority of cleanup work currently funded under the ODDCF is associated with releases of gasoline and diesel products from regulated USTs, reported during the period from the late 1980s through December 1998. After 1998, most operating facility owners achieved substantial compliance with regulations and the number

of new releases significantly decreased. Vapor-related releases, with MtBE as the principal contaminant of concern, also contributed to the current active project population with groundwater impacts.

ODDCF cleanup expenses from 1990 through the present were fairly evenly distributed among the Initial Response, Site Investigation, Remedial, and Monitoring phases as new projects were initiated and existing projects closed. There are 620 active ODDCF-eligible projects with 10 new projects reported in FY 2014. In future years, the percentage of remedial costs will increase as regulatory closure of active projects is completed, and the discovery of new releases requiring investigation diminishes for regulated AST and UST facilities.

In comparison, the majority of work under the FODCF was associated with releases from residential fuel oil tanks, with 57% of expenses for Initial Response. There are 139 active, FODCF-eligible projects with 111 new on-premise-use fuel oil tank releases reported in FY 2014.

Activity under the MODCF is more limited due to fewer reported releases. There are 12 active projects in the investigation, remediation and monitoring phases. For the GREE Fund, there are 63 active projects also in the investigation, remediation and monitoring phases, including 7 public water supplies on increased monitoring due to MtBE found during routine annual sampling.

Table 3 and Figure 1 in the Appendix, respectively, provide cleanup project

statistics and illustrate the historic distribution of cleanup project costs for purposes of comparison among the four funds. Table 4 in the Appendix provides a detailed list of in-progress cleanup projects by community.

Financial Activity

Management Discussion of Income and Expenses: Annual operating revenue to the ODDCF, FODCF and MODCF is provided through import fees on petroleum products collected by the Department of Safety. Annual operating revenue to the GREE Fund is provided through transfers from the ODDCF. Each fund has a balance “ceiling and floor” established by statute, such that import fee collections are suspended when the ceiling is reached and collections resume when the balance is paid-down to the floor. However, with the possible exception of the MODCF, current and future demand for program funds will likely preclude reaching the ceilings. Ensuring that sufficient funds are available to support present and future cleanup projects is a primary focus of program planning.

Fund program financial operations follow the State FY calendar of July 1st to June 30th, and the state biennium budget cycle.

The Board is pleased to report the majority of program revenues are directed to achieving established goals and objectives, while (historic) overall program management and administrative costs for the four-fund program are 11.1% of total expenses. DES supervisory, project management, facility compliance and administrative staff are able to work under all four funds on a program

basis, through the use of a single administrative expense account that is supported by the four funds. This shared approach provides more efficient use of day-to-day staff-hour resources. Overtime and compensatory time is also available to provide additional staff-hours as needed to meet peak workload demands, versus maintaining sufficient full-time staff to cover all potential workload demands. In FY 2014, DES staff processed cleanup and release prevention reimbursements and managed cleanup work totaling \$13,548,024.

Operating Revenues: ODDCF revenues increased 2% from \$11,569,347 in FY 2013 to \$11,748,101 in FY 2014. A level or slowly increasing motor fuel import trend would reasonably be expected due to State population growth being offset by increasing vehicle fuel efficiency. Retail price fluctuation of gasoline and diesel fuel may influence imports in future years and the impacts cannot be fully predicted. DES has re-prioritized many cleanup projects to optimize available revenues, and maintain a minimum fund balance for contingencies. The ODDCF balance decreased 41% from \$2,775,497 at the end of FY 2013 to \$1,628,178 at the end of FY 2014, due to steady demand for cleanup project funding and increased administrative expenses.

FODCF revenues increased 43% from \$2,029,136 in FY 2013 to \$2,904,971 in FY 2014, primarily due to the 0.25¢ import fee increase and persistent winter weather. Historically, FODCF revenues are seasonally-dependent and fuel oil price-sensitive. Since FY 2005, FODCF revenues have generally declined with decreasing

imports due to changing weather patterns and conversion to alternate heating fuels. However, imports may be stronger in a given year as occurred in FY 2014. Since the FODCF balance increased from \$265,602 at the end of FY 2013 to \$1,617,401 at the end of FY 2014, a FY 2015 operating budget increase can be requested.

MODCF revenues decreased 11% from \$237,064 in FY 2013 to \$211,275 in FY 2014. However, FY 2014 revenue is still consistent with expected averages and is sufficient to support program activities provided no new large cleanup projects are identified. The fund balance increased 8% from \$413,588 at the end of FY 2013 to \$448,673 at the end of FY 2014, due to a decrease in cleanup project expenses.

Reported GREE Fund revenues decreased 25% from \$1,785,633 in FY 2013 to \$1,332,824 in FY 2014. However, this was due to a \$441,036 transfer not being completed in FY 2014 that will instead be included with FY 2015. Thus, actual revenues were \$1,773,860, a decrease of 0.7%. Investigation and remediation projects are in progress for which the current fund balance and annual revenues are allocated. Total GREE Fund revenues cannot address the entire problem of MtBE contamination remaining statewide. The fund supports specific cleanup projects, maintenance-level services to investigate and monitor contamination levels, and alternate water where on-site water supply wells are contaminated. The fund balance decreased 16% from \$1,329,015 at the end of FY 2013 to \$1,120,633 at the end of FY 2014.

Program Management & Administrative Costs: Total program management and administrative cost allocations rose from \$2,457,453 in FY 2013 to \$2,587,341 in FY 2014, due to general increases in personnel and operating expenses. However, as noted previously, overall historic program management and administrative costs are 11.1% of total expenses. Administrative cost allocation budgets for FY 2015 are based on an assumption that all positions remain filled, and applying conservative estimates for operating expenses and inter-agency transfers for program support costs. In addition, the Board share of DES contaminated site management costs and related expenses is expected to increase in FY 2015 due to level funding in federal grants.

Cleanup Project Expenses: ODDCF cleanup project expenses decreased 6% from \$11,899,414 in FY 2013 to \$11,166,197 in FY 2014, but demand is expected to remain steady due to remediation projects. Such projects take time to complete all needed preliminary investigations, cost analysis, planning, design, and bidding (if applicable.) Thus, total cleanup project expenses may increase or decrease from year-to-year. More projects are expected to be completed in FY 2015. The steady average annual demand for AST and UST cleanup funds is attributable to a slow decline in the population of active projects due to the high percentage with groundwater impacts. Closing these projects requires considerable investment in active remediation or long-term monitoring with natural attenuation. The ODDCF \$10,500,000 FY 2015 cleanup budget is lower than demand.

The 41% decrease in the fund balance from \$2,775,497 in FY 2013 to \$1,628,178 in FY 2014, and projected FY 2015 and FY 2016 revenues, necessitates a FY 2016 budget reduction to \$9,500,000.

FODCF cleanup project expenses decreased 57% from \$2,229,878 in FY 2013 to \$966,949 in FY 2014, due to a reduction in the budget. Some projects put on hold to stabilize the fund balance in FY 2009 were completed, and the number of new on-premise-use facility projects remained steady at 111. The average annual demand for on-premise-use facility funds is expected to be steady and new AST projects may also be identified. The large increase in the fund balance and strong revenues, support an increase in the FY 2015 cleanup project budget to \$1,650,000.

MODCF cleanup project expenses decreased 3% from \$118,235 in FY 2013 to \$114,355 in FY 2014. No large projects have been identified that will increase expenses above the current \$200,000 budget for FY 2015.

Finally, GREE Fund cleanup expenses, including reimbursements and DES contractor costs, decreased 31% from \$1,634,508 in FY 2013 to \$1,127,083 in FY 2014.

Release Prevention Expenses: FODCF Safetank expenses decreased 30% from \$246,235 in FY 2013 to \$173,440 in FY 2014 due to a reduction in the budget. Average annual demand of approximately \$450,000 is expected to continue for a number of years. The increase in FY 2014 revenues and fund balance allow a budget increase for FY 2015 and 2016. Fully funding this important program will continue to offer benefits in future years through reduced cleanup expenses.

Total Available Funds: If total available funds, i.e., new revenues plus fund balance, are not sufficient, cleanup work may be delayed or postponed indefinitely. Delay or postponement increases the risk to public health and the environment as contaminants move further from the source property, through soil and water media. It is also important that reserve funds be available for significant cleanup events. Projected flat annual revenues necessitates that ODDCF remediation projects are prioritized, and work is limited to a certain number of projects each year. Stabilization of FODCF annual

revenues provides funds for new work, and allows cleanup project and Safetank work delayed in prior years to be completed.

Tables 5 and 6, respectively, in the Appendix summarize comparative FY 2013 & FY 2014 financial performance, and FY 2015 & FY 2016 projected revenues and expenses for the four-fund program. Figure 2 in the Appendix illustrates the distribution of FY 2014 revenues and expenses.

Appendix

Oil Fund Disbursement Board FY 2014 Annual Report

Table 1 - Historic Financial Performance

Category	Oil Discharge & Disposal Cleanup Fund (RSA 146-D)	Fuel Oil Discharge Cleanup Fund (RSA 146-E)	Motor Oil Discharge Cleanup Fund (RSA 146-F)	Gasoline Remediation & Elimination of Ethers Fund (RSA 146-G)
Year Statute Effective	1988	1993	1995	2001
Revenues & Start-up Funds	\$219,247,850	\$51,759,869	\$4,896,230	\$21,900,966
Program Management & Administrative Costs	(\$20,780,602)	(\$4,923,385)	(\$1,032,597)	(\$5,678,215)
Program Management & Administrative Costs - % of Total Expense	9.5%	9.9%	30.0%	27.3%
Loan Expense (1)		(\$2,000,000)	(\$400,000)	
Reimbursed Cleanup Expenses	(\$196,839,070)	(\$39,342,852)	(\$2,004,165)	(\$13,794,145)
Release Prevention Expenses - RSA 146-E; Research & Contracted Cleanup Expenses - RSA 146-G	N.A.	(\$3,676,231)	N.A.	(\$1,307,973)
Transfers (2)		(\$200,000)	(\$950,000)	
Balance – FY 2014	\$1,628,178	\$1,617,401	\$448,673	\$1,120,633

NOTES:

(1) Loan expenses result from repayment of program start-up funds and other inter-fund loans (included in revenues).

(2) Laws of 2003, Chapter 187, transfers to other agencies. FY 2011 \$250,000 transfer from Motor Oil Discharge Cleanup Fund to general funds.

Oil Fund Disbursement Board FY 2014 Annual Report

Table 3 - Distribution of Cleanup Projects as of June 30, 2014

Fund	Total New Projects in FY 2014	Eligible Projects in Progress by Cleanup "Phase"					Eligible Projects Completed	
		Initial Response Action	Site Investigation	Remedial Action	Monitoring	Total In Progress	Number	Average Years to Complete
Oil Discharge & Disposal Cleanup, RSA 146-D	AST; 1	0	4	10	28	42	AST; 52	4.9
	UST; 9	4	39	173	362	578	UST; 997	6.7
Gasoline Remediation & Elimination of Ethers, RSA 146-G	0	0	15	16	32	63	151	4.7
Fuel Oil Discharge Cleanup, RSA 146-E	AST; 0	0	1	3	4	8	AST; 17	5.6
	On-premise-use (1); 111	46	40	7	38	131	On-premise-use; 1,839	1.3
Motor Oil Discharge Cleanup Fund, RSA 146-F	0	0	2	4	6	12	35	3.8

(1) 93 residential, 10 business, 6 schools, and 2 churches

Initial Response Action includes activities to contain a petroleum discharge and abate immediate environmental and public health risks. The work may include soil removal, petroleum recovery and vapor mitigation. Less complex projects, e.g., on-premise-use fuel oil discharges at private homes, may remain in this phase from start to completion.

Site Investigation is needed at more complex projects to determine the magnitude and extent of contamination to develop a remedial plan. A typical investigation involves installation of groundwater monitoring wells and sampling/analysis to determine groundwater flow and receptors.

Remedial Action is needed at more complex projects to remove or treat contamination in soil and groundwater, and abate vapor problems.

Monitoring is performed to determine if/when groundwater contamination has decreased to State standards. For some projects under Monitoring, completion could be accelerated with the introduction of chemical compounds to aid in natural degradation. For GREE Fund projects, Monitoring also includes 7 public water supplies that are performing additional periodic water quality analysis due to the presence of MtBE.

Oil Fund Disbursement Board FY 2014 Annual Report

Table 5 - FY 2013 & FY 2014 Comparative Financial Performance

Category	Oil Discharge & Disposal Cleanup Fund (RSA 146-D)		Fuel Oil Discharge Cleanup Fund (RSA 146-E)		Motor Oil Discharge Cleanup Fund (RSA 146-F)		Gasoline Remediation & Elimination of Ethers Fund (RSA 146-G)	
	2013	2014	2013	2014	2013	2014	2013	2014
Beginning Balance (1)	\$4,636,018	\$2,724,056	\$1,130,008	\$287,461	\$351,665	\$412,548	\$1,630,554	\$1,329,015
Revenues (2)	\$11,569,347	\$11,748,101	\$2,029,136	\$2,904,971	\$237,064	\$211,275	\$1,785,633	\$1,332,824
Program Management & Administrative Costs (3)	(\$1,530,454)	(\$1,677,782)	(\$417,429)	(\$434,642)	(\$56,906)	(\$60,795)	(\$452,664)	(\$414,123)
Reimbursed Cleanup Expenses (4)	(\$11,899,414)	(\$11,166,197)	(\$2,229,878)	(\$966,949)	(\$118,235)	(\$114,355)	(\$1,344,387)	(\$899,089)
Release Prevention Expenses - RSA 146-E; Contracted Cleanup Expenses - RSA 146-G (5)	N.A.	N.A.	(\$246,235)	(\$173,440)	N.A.	N.A.	(\$290,121)	(\$227,994)
Ending Balance	\$2,775,497	\$1,628,178	\$265,602	\$1,617,401	\$413,588	\$448,673	\$1,329,015	\$1,120,633

NOTES:

(1) A one-time beginning balance adjustment was made for FY 2014 to convert from cash-basis to modified accrual method reporting.

(2) Total revenues include import fees, interest and inter-fund transfers. \$441,036 in GREE Fund revenues were inadvertently not reported in FY14, and will be included with FY15.

(3) Program management and administrative costs may include: DES project management, fund administration and facility compliance services, Dept. of Safety import fee collection activities, and Dept. of Justice legal services.

(4) Cleanup expenses are for reimbursements of costs incurred by eligible parties.

(5) Under the Fuel Oil Fund, release prevention expenses are for reimbursements of up to \$1,500 for low-income homeowners to replace substandard heating oil storage tanks. Under the Gasoline Ether Fund, research expenses are for studies of the statewide MtBE contamination problem. There are no studies in progress at this time. Gasoline Ether contracted cleanups are for locations where the MtBE contamination source is unknown. At such locations, NHDES may provide temporary water supplies and perform investigations and other work to address the contamination problem.

Ending Balance	\$652,154	\$711,847	\$2,116,638	\$2,025,128	\$371,637	\$295,894	\$665,872	\$999,926

NOTES:

(1) Total revenues are based on historic averages, projected fuel import activity and import fees established under current law. Revenue includes import fees, interest and inter-fund transfers.

(2) Program management and administrative costs may include: DES project management, facility compliance and fund administration services, Dept. of Safety import fee collection activities, and Dept. of Justice legal services.

(3) In general, projected cleanup, release prevention, research and contracted cleanup expenses are as currently budgeted, or anticipated based on available revenues, and may be less than actual demand. Availability of revenues/balance may facilitate a request to Fiscal Committee/Governor & Council to increase cleanup and release prevention budgets as necessary.
