

SUMMARY: ASBESTOS DISPOSAL SITE PROJECT REQUIREMENTS PURSUANT TO Env-Sw 2100 & Env-A 1800				
PROJECT TYPE (REF. ENV-A 1800 AND ENV-SW 2105.04)	WORKER CREDENTIALS (REF. ENV-A 1800)	WORK PLAN REQUIREMENTS (REF. ENV-SW 2106)	PROJECT COMMENCEMENT NOTIFICATION REQUIREMENTS (REF. ENV-SW 2105.07)	REPORTING REQUIREMENTS (REF. ENV-SW 2105.16 & ENV-SW 2105.17)

Minor Projects <i>quantity disturbed ≤ 1 m³ or 15 m²; (ref. Env-Sw 2102.17)</i>				
Emergency Projects, per Env-Sw 2102.12	Person performing work must: <ul style="list-style-type: none"> be a qualified individual (see Env-Sw 2102.20) be trained and certified per Env-A 1812, unless the work is a license-exempt small scale/short duration project¹ or license-exempt surface scrap removal project². (Note: the number of certified experienced workers at the site must equal or exceed the number of certified workers-in-training). work under a licensed entity or individual, unless the work is a license-exempt small scale/short duration project¹, license-exempt surface scrap removal project, or license-exempt single family homeowner self-implemented project³ 	No written work plan required	<u>Who:</u> <ul style="list-style-type: none"> Local Health Officer NH Dept. of Environmental Services, Air Division(DES-Air) <u>How & When:</u> Verbal notice as soon as practicable under the circumstances, followed within 48 hours by written confirmation <u>Exceptions:</u> <ul style="list-style-type: none"> For license-exempt small scale/short duration projects, notify the Local Health Officer before starting the work (ref. Env-A 1811). For license-exempt surface scrap removal projects, there is no notice requirement. 	<ul style="list-style-type: none"> Site owner must maintain complete project records. If disposal area is reconfigured, submit as-built drawing to DES-Waste within 60 days of project completion. Maintain waste shipment records per 40 CFR 61 & 49 CFR 171-172.
Non-Emergency Projects			<u>Who:</u> <ul style="list-style-type: none"> Local Health Officer NH Dept. of Environmental Services, Air Division (DES-Air) <u>How & When:</u> Verbal or written notice as soon as practicable after knowing work involves asbestos. If verbal, provide written notice within 48 hours thereafter	
Major Projects <i>quantity disturbed >1 m³ or 15 m² (ref. Env-Sw 2102.16)</i>				
Emergency Projects, per Env-Sw 2102.12	Person performing work must: <ul style="list-style-type: none"> be a qualified individual (see Env-Sw 2102.20). be trained and certified per Env-A 1812, unless the work is a license exempt surface scrap removal project² (Note: the number of certified experienced workers at the site must equal or exceed the number of certified workers-in-training). work under a licensed entity or individual, unless the work is a license-exempt surface scrap removal project, or license-exempt single family homeowner self-implemented project. 	No written work plan required	<u>Who:</u> <ul style="list-style-type: none"> Local Health Officer NH Dept. of Environmental Services, Air Division (DES-Air) NH Dept. of Environmental Services, Waste Division (DES-Waste) <u>How & When:</u> Verbal notice as soon as practicable under the circumstances, followed within 48 hours by written confirmation	<ul style="list-style-type: none"> Site owner must maintain complete project records. If disposal area is reconfigured, submit as-built drawing to DES-Waste within 60 days of project completion. Maintain waste shipment records per 40 CFR 61 & 49 CFR 171-172. If project takes over 2 weeks, submit weekly progress reports to DES-Waste and local health officer. Within 60 days of completion, submit project completion report to DES-Waste and Local Health Officer.
Non-Emergency Projects			<u>Exception:</u> No notice is required for surface scrap removal projects.	

¹ License-exempt small scale/short duration projects involve the disturbance of less than one cubic foot and 3 square feet of asbestos waste, completed within 2 hours of being initiated. The work can not be part of a larger project that is being segmented into several small scale, short duration tasks. See Env-A 1811.03(c) for additional detail.

² License-exempt surface scrap removal projects involve the removal of non-friable asbestos ONLY from the ground surface to a container for disposal at an authorized facility in accordance with Env-Sw 901. The work does not involve excavation below the ground surface or contact with friable asbestos. See Env-A 1811.03(d)

³ License-exempt homeowner self-implemented projects involve the disturbance of an asbestos disposal site by the owner of a single-family, owner occupied residence, on the property where that residence is located. See Env-A 1811.03(b). Note: The property owner is exempt from having to work under the authority of a license, but is NOT exempt from having to be trained and certified pursuant to Env-A 1812.
