

NEW HAMPSHIRE STORMWATER MANUAL

VOLUME 1 STORMWATER AND ANTIDEGRADATION DECEMBER 2008

NEW HAMPSHIRE STORMWATER MANUAL

VOLUME 1 Stormwater and Antidegradation

Written by Jillian McCarthy

Compiled and Edited by Comprehensive Environmental Inc.

Design and Layout by Comprehensive Environmental Inc.

Illustrations by Jillian McCarthy

Photography by New Hampshire Department of Environmental Services

Cover Photograph by Jeffrey Marcoux, New Hampshire Department of Environmental Services.
Rain garden and pervious walkway installation at Peterborough Town Hall in Peterborough, NH.

NEW HAMPSHIRE STORMWATER MANUAL

VOLUME 1 Stormwater and Antidegradation

December 2008
Revision 1.0

Thomas S. Burack, *Commissioner*

Michael J. Walls, *Assistant Commissioner*

Harry Stewart, P.E., *Director, Water Division*

This manual is funded in part through a Clean Water Act Section 319 Nonpoint Source Program grant and a Clean Water Act Section 104(b)(3) grant from the U.S. Environmental Protection Agency through the New Hampshire Department of Environmental Services, Watershed Assistance Section.

Printed on Recycled Paper

Acknowledgements

To the individuals who assisted in the creation of this manual, a special thank you for your time, commitment, and support, and for your dedication to the protection of New Hampshire's environment.

NHDES Project Team

Amy C. Clark, P.E., *NHDES Terrain Alteration Bureau*
Gregg Comstock, P.E., *NHDES Water Quality Section*
Paul Currier, P.E., *NHDES Watershed Management Bureau Administrator*
Ridgely Mauck, P.E., *NHDES Terrain Alteration Bureau*
Jillian McCarthy, *NHDES Watershed Assistance Section*
Eric Williams, *NHDES Watershed Assistance Section*

Provided Support and Assistance

Laura Aibel, *City of Concord, NH*
Arlene Allen, *NHDES Wetlands Bureau*
Jeffrey G. Andrews, P.E., *NHDES Wastewater Engineering Bureau*
Bill Arcieri, CPESC, *Vanasse Hangen Brustlin, Inc.*
Richard G. Ball, *Town of Belmont, NH*
Sara Carbonneau, *Town of Swanzey, NH*
Alicia Carlson, *NHDES Drinking Water and Groundwater Bureau*
Jeffrey K. Clifford, P.E., *Altus Engineering, Inc.*
Karen H. Dudley, CPSC, *Natural Resources Conservation Services*
Darlene Forst, *NHDES Wetlands Bureau*
James P. Gove, CSS, CWS, CPSC, CPESC, *Gove Environmental Services, Inc.*
Tony Marcotte, P.E., *MDP Development, Inc.*
Kevin A. McCaffery, P.E., *Stantec*
Tyler Phillips, CPESC, *Horizons Engineering*
Michael J. Redding, P.E., CPESC, *GeoInsight, Inc.*
Pierce Rigrod, *NHDES Drinking Water and Groundwater Bureau*
Robert Roseen, P.E., Ph.D., *University of New Hampshire*
Randall Shuey, CPESC, *New England Environmental, Inc.*
Gary Springs, CPESC, *Certified Erosion Control – NH*
J. Daniel Tatem, *Stantec*

Project Team at Comprehensive Environmental, Inc.

Rebecca Balke, P.E., Senior Engineer
Julia Capurso, E.I.T., Project Engineer
David Nyman, P.E., Project Manager
Eileen Pannetier, Program Director

Table of Contents

Chapter 1 Introduction	1
1-1. About the New Hampshire Stormwater Manual	2
1-2. About Volume 1	3
Chapter 2 Message for Municipalities	6
2-1. Municipal Issues of Concern.....	7
Alternatives to Conventional Stormwater Management Methods	7
State & Federal Permitting Programs	8
Antidegradation Provisions	8
Selection and Design of Best Management Practices (BMPs).....	9
2-2. Municipal Stormwater Management Tools	10
Watershed Management Planning.....	10
Municipal Ordinances.....	12
Easements and Deed Restrictions	12
Stormwater Utilities	14
Chapter 3 Fundamentals of Stormwater Management	15
3-1. Hydrologic Impacts	15
3-2. Water Quality Impacts.....	16
3-3. Concerns with Conventional Stormwater Management.....	17
Chapter 4 State and Federal Permitting Programs	19
4-1. Regulatory Authority.....	19
Federal Clean Water Act.....	19
New Hampshire Surface Water Quality Regulations.....	20
New Hampshire Wetland Rules.....	22
New Hampshire Comprehensive Shoreland Protection Act	23
4-2. Water Quality Certification and Permitting Programs.....	23
401 Water Quality Certification	23
New Hampshire Alteration of Terrain Permit	25
New Hampshire Wetland Permit.....	25
New Hampshire Shoreland Permit	26
National Pollutant Discharge Elimination System Program	26
Chapter 5 Antidegradation	30
5-1. Antidegradation Provisions	30
Water Quality Categories	30
Impaired Waters.....	30
Tier One Waters.....	31
Tier Two Waters (High Quality).....	31
Outstanding Resource Waters.....	31
Assimilative Capacity	32
Insignificant Versus Significant Pollutant Loading	33
Demonstration of Economic or Social Development.....	33

5-2. Proposed Antidegradation Requirements	34
Proposed Surrogate Measures for Pollutant Loading Analysis – The 1065 Rule	35
Effective Impervious Cover (EIC)	35
Undisturbed Cover (UDC)	36
Impervious Cover Model Background.....	36
Proposed Water Quality Requirements	37
Proposed Submittal Items and Formats	38
Curve Numbers.....	41
Chapter 6 Non-Structural Site Design Techniques	43
6-1. Site Design Techniques	43
Minimize Disturbed Areas.....	44
Maintain Natural Buffers.....	45
Minimize Impervious Cover.....	46
Disconnect Impervious Cover	47
Minimize Soil Compaction	47
Use Alternative Pavement.....	49
6-2. Impervious Surface Disconnection Methods	50
Disconnection of Rooftop Runoff	51
Disconnection of Non-Rooftop Runoff.....	52
Chapter 7 Introduction to Best Management Practices.....	55
7-1. Pre-Treatment Practices	55
Sediment Forebays	55
Vegetated Filter Strips.....	56
Pre-treatment Swales	56
Flow Through Devices.....	56
7-2. Treatment Best Management Practices.....	57
Stormwater Ponds	57
Infiltration Practices	60
Filtering Practices	62
Treatment Swales.....	64
Vegetated Buffers.....	64
7-3. Construction-Phase Management Practices.....	66
Erosion Control Practices	66
Sediment Control Practices	69
Winter Weather Stabilization and Construction Practices.....	74
7-4. Selection Criteria for Best Management Practices.....	74
Land Use Criteria.....	75
Site Physical Feasibility Factors.....	75
Watershed Resource Factors	76
BMP Capability Factors	76
Maintenance Factors	76
Community and Environmental Factors	76
7-5. Stormwater System Operation and Maintenance Plan.....	77
7-6. Road Salt and Deicing Minimization Plan	77

Chapter 8 Pollutant Loading Calculations.....	80
8-1. The Simple Method	80
Simple Method Calculations	80
Calculation for Chemical Constituents	80
Calculation for Bacteria.....	81
Calculation for Annual Runoff.....	81
Calculation for Runoff Coefficient	81
Limitations to the Simple Method.....	82
8-2. Simple Method Input Data.....	83
Simple Method Spreadsheet	83
Event Mean Concentrations of Stormwater Constituents	84
Best Management Practices (BMP) Pollutant Removal Efficiencies.....	84
Precipitation Data	84
Appendix A. Example Deed Restriction Template.....	87
Appendix B. Example Drainage Easement Language	93
Appendix C. Deicing Application Rates and Documentation Form	97
Appendix D. Typical Stormwater Pollutant EMCs.....	101
Appendix E. BMP Pollutant Removal Efficiency.....	105

List of Tables

Table 6-1. Misconceptions & Truths about Porous Pavement Compared to Traditional Pavement.....	50
--	----

List of Figures

Figure 1-1. Illustration of the boundary of a watershed	11
Figure 1-2. Deed restricted wetland buffer area within 75 feet of the wetland setback must remain undisturbed in perpetuity	12
Figure 4-1. Illustration of the relationship between designated uses, water quality criteria, and water quality parameters in the New Hampshire Surface Water Quality Regulations.....	22
Figure 4-2. Applicability of Permit Programs.....	28
Figure 5-1. Summary of water quality categories related to Antidegradation	32
Figure 5-2. The volume of stormwater entering the storm drainage network can be reduced by decreasing the amount of effective impervious cover and increasing the amount of undisturbed cover on a site.....	35
Figure 5-3. Impervious Cover Model relating percent watershed impervious cover to stream quality	38
Figure 5-4. Applicability of the Proposed Antidegradation Provisions ...	40
Figure 6-1. Property with nearly all of the vegetation removed.	43
Figure 6-2. Property with vegetation selectively cleared to minimize disturbance.....	44
Figure 6-3. Comparison of a lot with very little natural buffer to one with a significant natural buffer intact.	46
Figure 6-4. Reducing roadway widths can decrease impervious cover....	48
Figure 6-5. The amount of runoff and associated pollutants from a project can be reduced by disconnecting impervious surfaces through the disconnection methods described in Section 6-2.	51
Figure 8-1. Relationship between watershed imperviousness (I) and the storm runoff coefficient (R_v)	83
