Does the project impact a jurisdictional area (e.g. within the banks of the stream or wetland)?

No Permit Required

Is the planned work done in accordance with Env-Wt 303.05 for Projects that Do Not Require a Permit?

No Permit Required

Yes

Do the project involve installation of a structure and associated fill to cross wetlands, including streams to allow vehicular access to a piece of property for forest management including the transportation of forest products?

No

Yes

Does the project involve roadway construction through forested wetlands for the purpose of conducting forest management activities during frozen conditions?

No

Yes

Will the structure impact the bed or banks of any stream?

No

Yes

Does the project include maintenance or improvement of existing crop or pasture land for continued agricultural use in accordance with requirements including a Cooperator Agreement with the applicant’s county conservation district?

No Permit Required

Yes

Ensure you meet the requirements of the Wetlands Application for Minimum Impact Agriculture Projects before saying “yes”.

Wetlands Minimum Impact Forestry Notification required

Wetlands Permit by Notification required

~Forestry BMPs required

~Natural Heritage Bureau DataCheck Receipt required

Is the project a replacement of a culvert or bridge to one single family residence or building lot or to another property for noncommercial recreational use, including conservation projects?

No

Yes

Is the project located on a watercourse where the contributing watershed is less than or equal to 25 acres?

No

Yes

506.01(a)(k) & Env-Wt 303.04(g)

Is the project a replacement of a culvert or bridge to one single family residence or building lot or to another property for noncommercial recreational use, including conservation projects?

Env-Wt 303.04(g)(6)&(7)

Is the temporary structure limited to one pier or post per 15 feet of span within the stream?

No

Yes

Will the temporary structure be removed within 2 years?

No

Yes

Are permanent structure abutments in the stream banks only?

No

Yes

Does the permanent structure cross a perennial stream or intermittent stream having a scoured channel of 8 feet or less?

Wetlands Minimum Impact Forestry Permit Application required

~Forestry BMPs required

~Natural Heritage Bureau DataCheck Receipt required

Env-Wt 303.04(g)(1)-(5)

Is the access used for subdivision, development or other land conversion to non forestry uses?

No

Yes

Is the roadway width at the crossing greater than 20 feet?

No

Yes

Is the fill width greater than 50 feet? Is the fill at any single crossing greater than 50 feet in length?

No

Yes

Does the crossing impact bogs, marshes, sand dunes, tidal wetlands or undisturbed tidal buffer zones?

No

Yes

Is any crossing within 100 feet of a prime wetland without a waiver?

No

Yes

Does the crossing of a swamp or wet meadow have standing water for more than 2 months of the year?

No

Yes

Has the Natural Heritage Bureau DataCheck indicated the project is in a wetland that has been identified as an exemplary natural community and that has documented occurrences of a state or federally endangered or threatened species?

No

Yes
