

The State of New Hampshire  
**Department of Environmental Services**

**Robert R. Scott Commissioner**

December 13, 2019

Dennis Deziel, Regional Administrator  
EPA New England, Region 1  
5 Post Office Square - Suite 100  
Boston, MA 02109-3912

Re: Request for approval of amendments to New Hampshire Surface Water Quality Standards

Dear Mr. Deziel:

On January 20, 2018, the New Hampshire Department of Environmental Services (NHDES) made a request to EPA to approve adopted amendments to the state's surface water quality standards<sup>1</sup>. One of those amendments, regarding the dissolved oxygen (DO) saturation standard, was precipitated by a change in state law. Senate Bill (SB)127, effective September 8, 2017, amended State statutes (RSA 485-A:2, A:6 and A:8) regarding dissolved oxygen standards. NHDES submitted a request to EPA to add this amended statute to our approved state surface water quality standards per the requirements of 40 CFR §131.6 and §131.20(c). This letter is to withdraw that request.

Since submitting our request, NHDES and EPA Region 1 have been in detailed communication. A request for more information was sent by EPA to the state on July 3, 2019. NHDES responded to this letter on October 23, 2019, to which EPA replied on November 7, 2019. At the same time, NHDES has been in close communication with stakeholders and legislators regarding this issue. What is clear from all of these communications is that the issue of changing the DO saturation standard is much more complicated than originally thought.

To this end, NHDES is working with the legislature to add more flexibility to the state's ability to set surface water quality standards for dissolved oxygen. House Bill 496 (as amended) was voted out of the NH Senate Energy and Natural Resources Committee by unanimous vote on November 21, 2019. This bill will be taken up by the full legislature in January 2020. The bill would give NHDES the flexibility to modify surface water quality standards to address stakeholder concerns while, at the same time, addressing the issues raised by EPA with the current request.

Therefore, NHDES respectfully withdraws our request for EPA approval of the amendment to the New Hampshire Surface Water Quality Standards relative to dissolved oxygen saturation per 40 CFR §131.5. NHDES will revisit the issue of dissolved oxygen and may resubmit a new request for amendment at a later date.

---

<sup>1</sup> On June 25, 1999, NHDES submitted documents required to satisfy the Clean Water Act Water Quality Standards docket. The submission included RSA 485-A:1 through A:4, RSA 485-A:8 and RSA 485-A:11, a list of Class A waters and surface water quality regulations (which were titled Env-Ws 430 in 1999 but are now titled Env-Wq 1700). On July 1, 1999, EPA acknowledged that the June 25, 1999 submittal was "complete and current".

Related to the change in statute in SB 127, NHDES also removed impairments for dissolved oxygen saturation as part of our submission to EPA in 2018 in fulfillment of Section 303(d) of the Clean Water Act. On August 8, 2019, NHDES submitted its 303(d) list to EPA for approval. As described in the document entitled, "Impairments Removed (i.e. Delisted) from the 2018 303(d) List of Threatened or Impaired Waters (i.e. Category 5)", NHDES proposed to change the status of a number of assessment units from Category 5 to Category 3-PNS (or 3-ND) for dissolved oxygen saturation that supports aquatic life use. The list of assessment units is attached to this letter.

NHDES now respectfully requests that EPA remove these impairment removals from further consideration at this time. We will forward via email an updated 303d spreadsheet which will reflect this modification.

The 2018 Section 305(b) and 303(d) Consolidated Assessment and Listing Methodology (CALM) describes in detail how surface water quality assessment decisions were made in fulfillment of 40 CFR 130.7(b)(6). The CALM will be changed for 2020 to reflect the above request and status of the DO saturation criteria at the time that the 2020 list is generated.

Should you have any questions, please do not hesitate to contact me at (603) 271-0677 or [thomas.o'donovan@des.nh.gov](mailto:thomas.o'donovan@des.nh.gov), or Ted Diers at (603) 271-3289 or [ted.diers@des.nh.gov](mailto:ted.diers@des.nh.gov).

Sincerely,

## **2018 - IMPAIRMENTS REMOVED DUE TO STATUTE CHANGES**

In 2017, SB127 amended three sections of RSA 485 with regards to dissolved oxygen water quality criteria. As a result of these changes to RSA 485-A:6, XIV, NHDES assigned the following dissolved oxygen saturation determinations to Category 3.
