1. Concentrations shown are in parts per trillion (ppt) or nanograms per liter (ng/L).
2. Cells that are shaded gray indicate an exceedance of the health based standards established September 2019.

Notes:

1. Concentrations shown are in parts per trillion (ppt) or nanograms per liter (ng/L).
2. Cells that are shaded gray indicate an exceedance of the health based standards established September 2019.
3. 'ND' indicates the analyzed PFAS was not detected above the laboratory reporting limit.
4. PFAS data represents highest concentration detected at the Site.

Notes:

1. Concentrations shown are in parts per trillion (ppt) or nanograms per liter (ng/L).
2. Cells that are shaded gray indicate an exceedance of the health based standards established September 2019.
3. 'ND' indicates the analyzed PFAS was not detected above the laboratory reporting limit.
4. PFAS data represents highest concentration detected at the Site.

Notes:

1. Concentrations shown are in parts per trillion (ppt) or nanograms per liter (ng/L).
2. Cells that are shaded gray indicate an exceedance of the health based standards established September 2019.
3. 'ND' indicates the analyzed PFAS was not detected above the laboratory reporting limit.
4. PFAS data represents highest concentration detected at the Site.
