

2010 LIST OF ALL IMPAIRED OR THREATENED WATERS

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Date: 6/10/10

Page 1 of 171

Notes:

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
(<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

Assessment Unit ID	Water Name	Primary Town	Water Size	Size Unit	Use Desc	Impairment Name	DES Category	Threat	TMDL Priority	Tmdl Schedule	Source Name

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
(<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

2010 LIST OF ALL IMPAIRED OR THREATENED WATERS

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Date: 6/10/10

Page 17 of 171

Notes:

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
(<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

Assessment Unit ID	Water Name	Primary Town	Water Size	Size Unit	Use Desc	Impairment Name	DES Category	Threat	TMDL Priority	Tmdl Schedule	Source Name

2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

2010 LIST OF ALL IMPAIRED OR THREATENED WATERS

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Date: 6/10/10

Page 33 of 171

Notes:

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
(<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

Assessment Unit ID	Water Name	Primary Town	Water Size	Size Unit	Use Desc	Impairment Name	DES Category	Threat	TMDL Priority	Tmdl Schedule	Source Name

2010 LIST OF ALL IMPAIRED OR THREATENED WATERS

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Date: 6/10/10

Page 40 of 171

Notes:

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
(<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

Assessment Unit ID	Water Name	Primary Town	Water Size	Size Unit	Use Desc	Impairment Name	DES Category	Threat	TMDL Priority	Tmdl Schedule	Source Name

2010 LIST OF ALL IMPAIRED OR THREATENED WATERS

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Date: 6/10/10

Page 46 of 171

Notes:

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed. (<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

2010 LIST OF ALL IMPAIRED OR THREATENED WATERS

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Date: 6/10/10

Page 52 of 171

Notes:

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed. (<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

2010 LIST OF ALL IMPAIRED OR THREATENED WATERS

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Date: 6/10/10

Page 58 of 171

Notes:

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
(<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

2010 LIST OF ALL IMPAIRED OR THREATENED WATERS

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Date: 6/10/10

Page 64 of 171

Notes:

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed. (<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

Assessment Unit ID	Water Name	Primary Town	Water Size	Size Unit	Use Desc	Impairment Name	DES Category	Threat	TMDL Priority	Tmdl Schedule	Source Name

2010 LIST OF ALL IMPAIRED OR THREATENED WATERS

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Date: 6/10/10

Page 70 of 171

Notes:

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
(<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
(<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

2010 LIST OF ALL IMPAIRED OR THREATENED WATERS

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Date: 6/10/10

Page 83 of 171

Notes:

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed. (<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

2010 LIST OF ALL IMPAIRED OR THREATENED WATERS

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Date: 6/10/10

Page 90 of 171

Notes:

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed. (<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

2010 LIST OF ALL IMPAIRED OR THREATENED WATERS

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Date: 6/10/10

Page 96 of 171

Notes:

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed. (<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

2010 LIST OF ALL IMPAIRED OR THREATENED WATERS

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Date: 6/10/10

Page 102 of 171

Notes:

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
(<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

2010 LIST OF ALL IMPAIRED OR THREATENED WATERS

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Date: 6/10/10

Page 10 of 171

Notes:

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
(<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

2010 LIST OF ALL IMPAIRED OR THREATENED WATERS

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Date: 6/10/10

Page 115 of 171

Notes:

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
(<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

2010 LIST OF ALL IMPAIRED OR THREATENED WATERS

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Date: 6/10/10

Page 12 of 171

Notes:

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
(<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

2010 LIST OF ALL IMPAIRED OR THREATENED WATERS

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Date: 6/10/10

Page 128 of 171

Notes:

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
(<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

2010 LIST OF ALL IMPAIRED OR THREATENED WATERS

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Date: 6/10/10

Page 140 of 171

Notes:

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
(<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

2010 LIST OF ALL IMPAIRED OR THREATENED WATERS

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Date: 6/10/10

Page 145 of 171

Notes:

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed. (<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

2010 LIST OF ALL IMPAIRED OR THREATENED WATERS

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Date: 6/10/10

Page 152 of 171

Notes:

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed. (<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

2010 LIST OF ALL IMPAIRED OR THREATENED WATERS

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Date: 6/10/10

Page 158 of 171

Notes:

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed. (<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

2010 LIST OF ALL IMPAIRED OR THREATENED WATERS

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Date: 6/10/10

Page 163 of 171

Notes:

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
(<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

2010 LIST OF ALL IMPAIRED OR THREATENED WATERS

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Date: 6/10/10

Page 168 of 171

Notes:

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed. (<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.

2010 LIST OF ALL IMPAIRED OR THREATENED WATERS

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Date: 6/10/10

Page 169 of 171

Notes:

1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
(<http://des.nh.gov/organization/divisions/water/wmb/swqa/2010/index.htm>)
2. This list is sorted by Waterbody Type and then Assessment Unit ID.
3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
5. This list only represents known impairments and threats, waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants.
