Emergency Water Supplies for the Public

- Municipalities may provide access to an emergency water supply for residents whose wells have been impacted by drought. Where possible, municipalities should designate a local source of water that is already associated with a state regulated public water system to ensure the water has been tested and is safe. If a source of drinking water is made available to the public that is not associated with a public water system, please contact **Steve Roy** at stephen.roy@des.nh.gov or by phone at (603) 271-0660.
