RE: HB 1304-FN-LOCAL, Relative to Vessel Registration and Boat Fee Decals

Dear Chair Ricciardi and Members of the Committee:

Thank you for the opportunity comment on House Bill (HB) 1304. This bill would modify the procedure for registration of vessels by requiring the issuance and display of a boat fee decal for payment of boat fees.

The New Hampshire Department of Environmental Services (NHDES) takes no position on the source of funding related to this bill and provides the following information for the Committee's consideration.

HB 1304 seeks to rectify a conflict with a federal law regarding fees attached to vessel registrations. According to federal law, to receive federal Coast Guard funding, the state must comply with eligibility requirements, which, of note, preclude the collection of other fees as part of an actual vessel registration (46 USC 13103(c)). Under current state legislation (RSA 270 E:5), additional registration fees are being collected for lake restoration and preservation programs; search and rescue; authorized agents, public boat access, and harbor dredging and pier maintenance. These fees each support critical state programs that protect the health, integrity, accessibility, safety and navigability of state waters. HB 1304 creates a decal program, by which the fees can be collected, to ensure the continued operation of the programs supported by the current fee-funds. The bill also requires this second decal to be mandatory.

Relative to the NHDES aquatic invasive species program, a \$9.50 fee is collected from each vessel registered in the state (generating approximately \$950,000 in annual program revenues), and the revenue from that fee wholly funds lake restoration and preservation activities related to the prevention, detection, and management of aquatic invasive species. The bulk of the revenues from this program are directed through grants to communities across the state to help mitigate impacts of aquatic invasive plant infestations in lakes, ponds and rivers in in New Hampshire, leveraging at least \$1.5 million annually in contributions from municipalities and local entities. Managing aquatic invasive plants, and protecting state surface waters for recreational, aesthetic, ecological, and commercial uses is invaluable. Boating activities are the primary means of spread of aquatic invasive species, so spread prevention efforts are key, as are efforts to reduce the density and distribution of invasive plants within waterbodies. This funding has been critical in reducing the rate

of invasive species spread and mitigating the impacts of infestations in waterbodies large and small across the state.

Thank you again for the opportunity to comment on HB 1304. Should you have questions or need additional information, please feel free to contact either Amy Smagula, Exotic Species Program Coordinator (Amy.P.Smagula@des.nh.gov, 603-271-2248) or Rene Pelletier, Director of the Water Division (Rene.J.Pelletier@des.nh.gov, 603-271-0677).

Sincerely,

A handwritten signature in black ink, appearing to read "Robert R. Scott". The signature is fluid and cursive, with a long horizontal stroke at the end.

Robert R. Scott
Commissioner
