I. BACKGROUND

A. WHEREAS, the State of New Hampshire Department of Environmental Services (“NHDES”), by and through the Office of the Attorney General (collectively, the “State”) has filed a Complaint pursuant to CERCLA § 107(a), 42 U.S.C. § 9607(a) and New Hampshire Revised Statutes Annotated ch. 147-A and 147-B in the United States District Court for the District of New Hampshire against Settling Defendants claiming Settling Defendants are jointly and severally liable to the State of New Hampshire for the State’s Past Response Costs incurred in connection with the Chlor-Alkali Facility (Former) Superfund Site in Berlin, New Hampshire (“Complaint”).

B. WHEREAS, the Chlor-Alkali Facility (Former) Superfund Site (“Site”) is located in the City of Berlin, Coos County, New Hampshire, on the eastern bank of the Androscoggin River (“Androscoggin River” or the “River”). The main part of the Site, which is referred to as the Cell House Property (or parcel) (“CHP”), is a landfill that contains debris and remnants of a former chlor-alkali facility/chemical plant that operated primarily in that same location. The entire Site includes the CHP and former chemical plant, all areas within the Androscoggin River with Site-related contaminants, its impoundments and floodplains, as well as any other location where hazardous substances from the contamination from the former chlor-alkali facility/chemical plant have come to be located.

C. WHEREAS, the former chemical plant was built during the late 1890s and operated through much of the 20th century by the Brown Company. Electrolytic cells were installed in cell houses to produce chlorine and sodium hydroxide for pulp and paper manufacturing. The chemical plant also produced other chemicals including chloroform, carbon tetrachloride, carbon disulfide, and calcium arsenate. The chemical plant, rail yard, and other structures were gradually dismantled over a number of years with demolition debris often consolidated into former building structures and left on Site. The CHP landfill was closed in 1999 with the installation of a low-permeability cap covered by two feet of wood chips. A slurry wall was added to control groundwater migration into the capped landfill area.

D. WHEREAS, the Defendants that have entered into this Consent Decree (“CD”) (“Settling Defendants” or “SDs”) are successors to the former owner/operators at the Site or have assumed the liabilities of one or more of the former owners/operators.

E. WHEREAS, in 1999, mercury was discovered to be discharging into the River through bedrock fractures in the riverbank, adjacent to the CHP. The NHDES completed several removals of mercury and mercury contaminated debris from the River, at times, together with the then current owners of the former chemical plant and surrounding pulp and paper mill property, or independently upon property abandonment pursuant to certain orders entered in a former owner’s Chapter 11 bankruptcy proceeding.

F. WHEREAS, at the request of the NHDES, the Site was proposed for listing to the National Priorities List (“NPL”) on April 27, 2005. Pursuant to Section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (“CERCLA”), 42 U.S.C. § 9605, EPA placed the Site on the NPL, set forth at 40 C.F.R. Part 300, by publication in the Federal Register on September 14, 2005, 70 Fed. Reg. 54286.

G. WHEREAS, in response to a release or a substantial threat of a release of hazardous substances at or from the Site, EPA conducted a Remedial Investigation (“RI”) for the Site completed on or about March 1, 2014. Settling Defendants conducted a Supplemental Remedial Investigation (“SRI”) completed on or about October 19, 2018; and Settling Defendants completed Feasibility Study (“FS”) for the Site on April 7, 2020, in accordance with 40 C.F.R. § 300.430.

H. WHEREAS, in accordance with Section 117 of CERCLA and 40 C.F.R. § 300.430(f), EPA published notice of the completion of the Feasibility Study and of the proposed plan for remedial action on May 28, 2020, in a major local newspaper of general circulation. EPA provided an opportunity for written and oral comments from the public on the proposed plan for remedial action. A copy of the transcript of the public meeting and comments received are available to the public as part of the administrative record upon which the Director, Superfund and Emergency Management Division, EPA Region 1, based the selection of the response action.

I. WHEREAS, EPA selected a remedial action to be implemented at the Site, which is embodied in a final Record of Decision (“ROD”), executed on September 23, 2020, on which the State had a reasonable opportunity to review and comment/on which the State has given its concurrence. The Record of Decision includes a summary of responses to the public comments. Notice of the final plan was published in accordance with section 117(b) of CERCLA.

J. WHEREAS, after EPA identified Settling Defendants as potentially responsible parties (“PRPs”) for the Site, the State submitted cost-recovery demand letters pursuant to Section 107(a) of CERCLA, 42 U.S.C. § 9607(a), as well as New Hampshire Revised Statutes Annotated ch. 147-A and 147-B, along with supporting documentation (*see* Appendices A-B).

K. WHEREAS, Settling Defendants do not admit any liability to Plaintiff arising out of the transactions or occurrences alleged in their demand letters or the State’s Complaint filed contemporaneously with this Consent Decree, nor do they acknowledge that the release or threatened release of hazardous substance(s) at or from the Site constitutes an imminent and substantial endangerment to the public health or welfare or the environment.

L. The Parties recognize, and the Court by entering this CD finds, that this CD has been negotiated by the Parties in good faith and implementation of this CD will expedite payment to the State for past response costs incurred at the Site and will avoid prolonged and complicated litigation between the Parties related to Past Response Costs, and that this CD is fair, reasonable, and in the public interest.

M. The Parties further recognize that this CD does not foreclose the State from instituting actions against SDs pursuant to CERCLA §107(a), 42 U.S.C. § 9607(a), or New Hampshire Revised Statutes Annotated ch. 147-A or 147-B, for remedial action at the Site and determinations of liability with respect to the Site and for any response costs incurred by the State in the future not settled and resolved hereby. In any such actions, SDs reserve fully all defenses, rights, and claims.

NOW, THEREFORE, it is hereby Ordered, Adjudged, and Decreed:

II. JURISDICTION

1. This Court has jurisdiction over the subject matter of this action pursuant to 28 U.S.C. § 1331, and 42 U.S.C. §§ 9607 and 9613(b) and pendent jurisdiction over the New Hampshire state law claims arising under N.H. Rev. Stat. Ann. §§ 147-A and 147-B. This Court also has personal jurisdiction over SDs. Solely for the purposes of this CD and the underlying Complaint, SDs waive all objections and defenses that they may have to jurisdiction of the Court or to venue in this District. SDs shall not challenge the terms of this CD or this Court's jurisdiction to enter and enforce this CD. The Complaint states claims against SDs upon which relief may be granted.

III. PARTIES BOUND

9. Except as specifically provided in this CD, nothing in this CD shall limit the power and authority of the State to direct, or order all actions necessary to protect public health, welfare, or the environment or to prevent, abate, or minimize an actual or threatened release of hazardous substances, pollutants, or contaminants, or hazardous or solid waste, on, at, or from the Site. Further, nothing in this CD shall prevent the State from seeking legal or equitable relief to enforce the terms of this CD, from taking other legal or equitable action as it deems appropriate and necessary for claims not settled by this CD, or from requiring SDs in the future to perform additional activities pursuant to any applicable law. Additionally, nothing in this CD shall prevent or prohibit the State from engaging in any negotiations or actions with the United States and/or SDs regarding remedial work at the Site and future response costs. SDs reserve fully all defenses, rights, and claims in the event of any subsequent State claims.

16. Nothing in this Decree diminishes the right of the State to pursue any person not a party to this Decree to obtain additional response costs or to undertake response actions and to enter into settlements that give rise to contribution protection.

Re: State of New Hampshire's Claims against and Georgia-Pacific Consumer Products LP and Fort James LLC relating to the Chlor-Alkali Facility (Former) Superfund Site in Berlin, New Hampshire

Dear Mr. Duncan:

The State of New Hampshire Department of Environmental Services, ("NHDES" or "Department"), by and through its counsel, the New Hampshire Office of the Attorney General (collectively, the "State") hereby provides notice of its claims against Georgia-Pacific Consumer Products LP and Fort James LLC as potentially responsible parties in connection with the Chlor-Alkali Facility (Former) Superfund Site ("Site") in Berlin, New Hampshire. Pursuant to Section 107(a) of the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), 42 U.S.C. §9607(a), as well as New Hampshire Revised Statutes Annotated, Chapters 147-A and 147-B, the State seeks cleanup of the Site as well as recovery of all costs incurred by the State in responding to the releases at the Site. The State is contacting you to join in the Environmental Protection Agency's ("EPA") Special Notice letter, its claims, and in its formal invitation to settle Georgia-Pacific Consumer Products LP's responsibility at the Site.

The State intends to join any potential forthcoming negotiations as an additional party and pursue settlement of its claims in conjunction with EPA and the United States Department of Justice. In the event that settlement of the State's claims is not achieved, the State reserves the right to bring civil action pursuant to CERCLA, N.H. RSA 147-A, RSA 147-B, and any other applicable law.

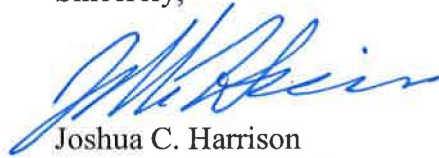

Letter to David A. Duncan
May 20, 2021
Page 2

Similar to the EPA, the State, by this letter, makes a demand for reimbursement of its past costs related to the Site and invites you to negotiate a consent decree in which you and other potentially responsible parties agree to perform the Remedial Design/Remedial Action activities consistent with EPA's March 30, 2021 letter and its September 2020 Record of Decision.

To date, the State has incurred response costs related to the Site. These costs relate to but are not limited to the following past Site activities: site discovery and associated investigations and monitoring; oversight of slurry wall and landfill design, construction, and maintenance, and the recovery of elemental mercury and mercury-containing debris from the Androscoggin River. The State seeks to recover from Georgia-Pacific Consumer Products LP and Fort James LLC its response costs and all interest authorized to be recovered under Section 107(a) of CERCLA and N.H. RSA 147-A and N.H. RSA 147-B.

New Hampshire's public records related to this Site may be made available to you by request to the New Hampshire Department of Environmental Services or to undersigned counsel for the Department. Please feel free to contact me at any time with questions or concerns. We look forward to future discussions.

Sincerely,
