

NOTICE

High levels of potentially harmful **CYANOBACTERIA** have been identified in this water.

ACTIVE WARNING

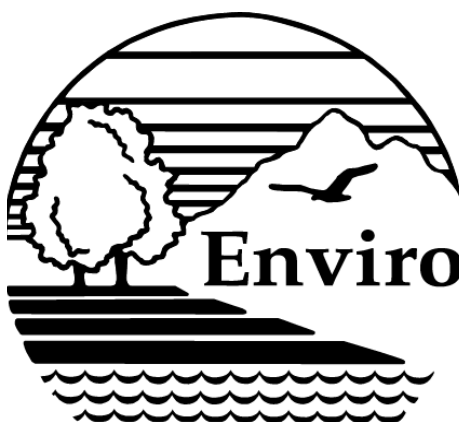

Water may not be suitable for wading or swimming if bloom material is visually present

Avoid contact with any surface scums and keep children and pets out of the water in the vicinity of the bloom. If you or a pet come in contact with scums or discolored water, rinse off with fresh water and monitor for symptoms.

This sign does not intend to close this area to the public, but to provide awareness that a potentially harmful cyanobacteria bloom was present here recently. Visually evaluate the water by looking for any discoloration or unusual growth such as clouds, ribbons or flecks.
